

The All-in-One Platform for Mixed Fleet Management and Maintenance

Consolidate and optimize fleet operations with an all-in-one platform that simplifies management, enhances visibility, and drives efficiency.

360²

Why 360² Is the Only Choice for Fleet Optimization

Unified Data Platform

Consolidates telematics, diagnostics, and inspection data across all OEMs into a single, user-friendly interface.

Fleet Health Scoring

Provides real-time health metrics, enabling proactive maintenance and reducing costly downtime.

Why 360² Is the Only Choice for Fleet Optimization

Streamline Operations:

Reduce the complexity of managing mixed fleets with a single, comprehensive platform.

Increase Uptime:

Stay ahead of breakdowns with predictive tools and proactive maintenance scheduling.

Enhance Decision-Making:

Access real-time insights to make data-driven decisions that optimize efficiency and profitability.

Predictive Maintenance

Anticipates service needs with data-driven insights, ensuring equipment stays operational longer.

Dynamic Dashboards

Customize views to monitor key metrics like engine hours, fluid analysis, and maintenance schedules in real-time.

Seamless Integration

Integrates effortlessly with existing CRM/DMS systems for a unified workflow.
