

The complete operating platform for CE & Ag equipment dealers.

There is no other.

Generic CRMs were built for anyone. Field service platforms were built for trases.

VizaLogix was built for the specific complexity of running a CE or Ag Dealership.

Replace your disconnected systems with one connected platform.

↑ Double-Digit

Increase in monthly billable hours

10x+

Revenue potential from connected asset data

\$10K–15K+

Per location avoided annually vs. legacy systems

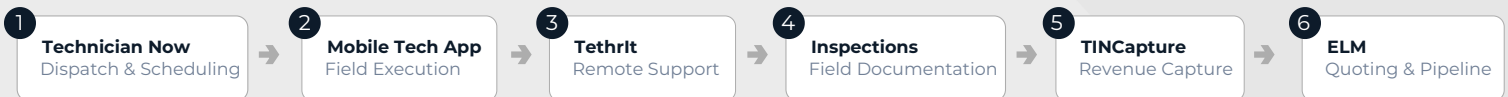

Days

To go live — not 12–36 months

THE PLATFORM

Every tool you need. One workflow. Every gap closed.

Every other platform solves one piece of the puzzle. VizaLogix connects the entire service operation. From the moment a job is dispatched to the moment it's completed, billed, and the next maintenance opportunity is already identified.

+ PM EXPERT — OEM-agnostic preventative maintenance command center, connects with ELM — Industry First

THE PROBLEM

Disconnected systems are costing revenue your team already earned.

- **Nothing connects start to finish**
Dispatch, support, and quoting all run as separate islands.
- **Work happens outside the system**
Support calls, findings, and inspections never make it back to the DMS.
- **Revenue falls between the cracks**
Findings get mentioned, forgotten, and never invoiced.
- **Every step is a manual handoff**
Re-entry, chasing, and follow-up by memory alone

REVENUE IMPACT

Four quantifiable impacts. Measurable from day one.

Unproductive Tech Labor	↑ Double-digit billable hours
Missed Lifecycle Revenue	10x+ lead conversion
Reactive Service & PM Risk	Proactive PM revenue
Legacy System Cost	\$10K–15K+ avoided/location

There is **no other platform** purpose-built for the CRM, workflow, and revenue intelligence needs of CE & Ag equipment dealerships. VizaLogix is not one of the options — it is the option.
